Hiring Manager

Bending Spoons

pisa, italy

Dear Hiring Manager,

I am thrilled to apply for the Security Engineer position at [Company Name]. As a recent B.Sc. graduate in Computer Science and Engineering from Port City International University, I bring a solid foundation in network security, vulnerability assessment, and system administration, honed through practical projects and professional training, which I am eager to apply to enhance your organization's cybersecurity posture.

My academic and hands-on experience have equipped me with the skills to excel in this role. I completed the Udemy course "Mastering Network Security: Defending Against Cyber Threats," where I mastered tools like Nmap, Wireshark, and Metasploit to identify and mitigate security risks. In a significant project, I optimized a BackBox Linux environment on a system to run security tools efficiently, documenting troubleshooting steps to ensure a stable testing platform. During my internship at a local IT firm, I conducted network monitoring, configured firewalls, and tested Wi-Fi security with Aircrack-ng, strengthening my ability to protect network infrastructure. I also practice pentesting in virtual environment.

I am particularly impressed by Bending Spoons's dedication to innovative security solutions, and I am confident that my technical expertise, combined with my problem-solving skills, will contribute to your team's success. My experience working independently on complex security tasks prepares me for a remote or on-site role, and I am willing to relocate and secure a work visa with Bending Spoons support to join your organization.

Thank you for considering my application. I am excited about the opportunity to leverage my skills to safeguard your systems and would welcome the chance to discuss how I can contribute. I look forward to the possibility of working with you.

Sincerely,

Saiful Islam Shakib
