Hiring Manager
Akamai Technologies
Malaysia

Dear Hiring Manager,

I am excited to apply for the Network Infrastructure Engineer position at Akamai Technologies. As a recent B.Sc. graduate in Computer Science and Engineering from Port City International University, I bring a solid foundation in network security, system administration, and web development, honed through academic projects, certifications, and practical experience. I am eager to contribute to Akamai's mission of delivering secure and scalable internet infrastructure solutions in a remote capacity.

My technical background aligns closely with the demands of this role. Through hands-on projects, I have developed proficiency in tools like Nmap, Wireshark, and Metasploit to monitor and secure network infrastructure, as demonstrated in my Network Security and Vulnerability Assessment project. Additionally, I built a Pharmacy Management System using PHP, HTML, and CSS, showcasing my ability to design and maintain robust systems. My internship at a local IT firm involved configuring firewalls, testing Wi-Fi security with Aircrack-ng, and collaborating remotely, further strengthening my network management skills.

Akamai's leadership in content delivery and cybersecurity innovation inspires me, and I am confident my skills in network monitoring, vulnerability assessment, and problem-solving will add value to your team. With certifications in network security and Python programming, including my ongoing pursuit of a CCNA certification, I am committed to continuous growth. I am prepared to work remotely and willing to secure a work visa with Akamai's support to join your organization.

Thank you for considering my application. I am enthusiastic about the opportunity to contribute to Akamai's network infrastructure excellence and would welcome the chance to discuss how my skills align with your needs. I look forward to the possibility of collaborating with your esteemed team.

Sincerely,
Saiful Islam Shakib
