Hiring Manager
Capgemini
Le Bourget-du-Lac, Auvergne-Rhône-Alpes, France

Dear Hiring Manager,

I am excited to apply for the Associate Network Security Engineer position at Capgemini (Job ID: 249650). As a recent B.Sc. graduate in Computer Science and Engineering from Port City International University, I bring a strong foundation in network security, system administration, and vulnerability assessment, honed through academic projects, certifications, and practical experience. I am eager to contribute to Capgemini's mission of delivering innovative technology solutions while advancing my career in network and security engineering.

My training and hands-on experience align closely with the demands of this role. Through Udemy courses like "Mastering Network Security: Defending Against Cyber Threats" and "Network Security 101: Start Network Security from Scratch," I have developed proficiency in tools such as Nmap, Wireshark, and Metasploit to identify and mitigate security risks. In a key project, I optimized a BackBox Linux environment on a 4GB RAM system to perform network monitoring and vulnerability scans, ensuring resource efficiency and stability. Additionally, my internship at a local IT firm involved configuring firewalls, testing Wi-Fi security with Aircrack-ng, and collaborating remotely to implement secure network protocols.

Capgemini's commitment to cutting-edge technology and global collaboration resonates with my career goals. My certifications in Python programming, Bash scripting, and ethical hacking, along with my ongoing pursuit of a CCNA certification, demonstrate my dedication to continuous learning. I am confident that my technical skills and problem-solving abilities will contribute to Capgemini's success. I am willing to relocate to France and secure a work visa with Capgemini's support to join your team.

Thank you for considering my application. I am enthusiastic about the opportunity to contribute to Capgemini's network and security initiatives and would welcome the chance to discuss how my skills align with your needs. I look forward to the possibility of working with your esteemed team.

Sincerely,
Saiful Islam Shakib
